

Have a picky eater at home ?

5 Tips to make them eat!

Dogs, like humans, can be picky with food. This is natural. However, having a picky child is always a problem. If you have one at home, here are a few tips to tackle them.

Mix Foods

If your dog likes something but doesn't eat what is in his plate then, mix both the foods. Try blending both the food because the dogs are extremely intelligent and can pick what they like from the plate.

1

Use Chicken

Chicken has this super power to make anything and everything tasty. If your dog is turning his face towards something healthy, mix a low sodium chicken broth with it.

2

Cut out on Human food

As pet parents we tend to feed human food for our pets when we eat. This exposes them to our taste and when you ask them to eat their food they turn deaf ears. As hard as it might sound to say a 'no', you should. Stop feeding your pets from your plate. This kills their appetite and also decreases their interest towards their food.

3

Cut Back Treats

If you keep feeding your dog with treats they might never feel hungry. Therefore, they will never want to eat their food. Treats is 'Junk Food' in Human Language.

4

Let them starve

Some pets can be extremely stubborn. They will not want to eat anything no matter what you do. Do not force-feed such pets, leave his/her food in the regular place for sometime. If they don't eat, then take it away. Wait until the next meal time and do the same. They will eventually give in.
