

POISONOUS FOODS FOR DOGS

1. Bones:

Can splinter in the throat or digestive tract. Bones are poisonous and deadly.

3. Moldy foods:

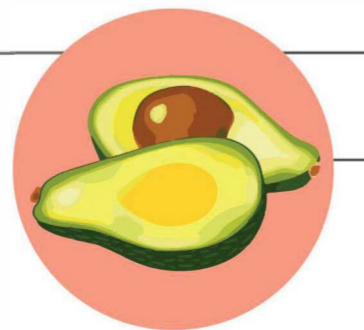

Moldy foods are poison because they may cause tremors in dogs.

5. Alcohol:

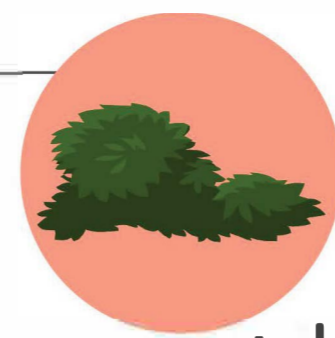

Even a single drop leads to coma, seizures and death in extreme cases.

7. Avocado:

This can cause nausea and diarrhoea in dogs.

2. Plants:

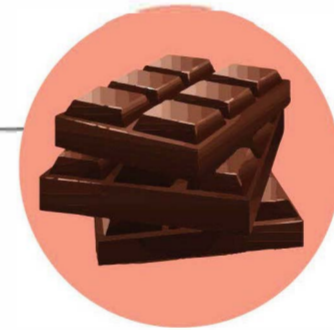

Indoor plants (some outdoor too) can cause mild nausea, gastrointestinal problems and death because of the toxin 'solanine'.

4. Active yeast:

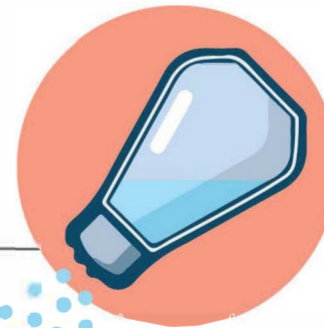

Found in bread dough, damages the internal organs and causes difficulty in breathing.

6. Chocolate:

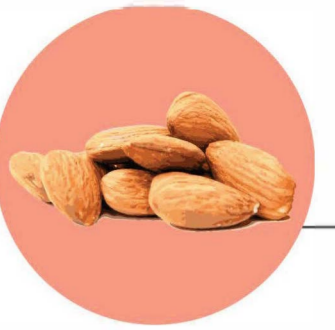

Dark or White, theobromine causes restlessness, stomach upset, vomiting, and kidney damage.

8. Salt:

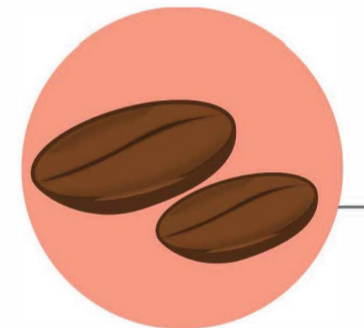

The high content of salt/sodium in dog foods causes dehydration in short term and obesity in long term.

9. Nuts:

May not be poisonous but makes your dog miserable and takes long time to recover.

10. Caffeine:

Caffeine is a powerful stimulant which has the same effects like theobromine in chocolate.
